Launch your own OBL to perform PAD revascularization procedures

We are experts at launching PAD OBLs for both Groups who see high volume PAD patients, and for PAD Proceduralists (Interventional Cardiologists, Vascular Surgeons, and Interventional Radiologists). We have done it numerous times for our [corporate locations](#), and we can do it for you. Please [contact us](#) if you are interested in learning more or would like to arrange a screenshare meeting.

Fast - 6 months from engagement to performing first procedure.

Low Cost - You could do it on your own for 3M+, or we could do it for you for a fraction of that.

Turnkey - We handle the paperwork, red tape, legal, financial, HR, training, protocols, processes, collateral, marketing, and drive the volume. You could go it alone and roll the dice, or you could benefit from the mistakes that we have made and learned from in the past.

Own - Proceduralists + Physicians are the owners of a 100% physician owned business.

ROI - Keep the revenue and control, don't relinquish both to the hospital. 300%+ ROIs are not uncommon.

Month 1 - Project Timeline, Market Analysis, Formation of business entities, Banking setup

Month 2 - Syndication Building, Payer Contracting, Proceduralists' Credentialing

Month 3 - Locations selection, Start Build-outs, Staff recruitment

Month 4 - Vendor contracting, Order clinical and general supplies, equipment, and disposables, Staff training

Month 5 - Radiation Safety Protocols and Manual, Medical Malpractice and General Liability Insurance, Licensing, Marketing Collateral

Month 6 - Kick-off meetings, PAD Seminars, Go-live

Ongoing - Revenue Cycle Management, People management and benefits administration, Fine-tuning of training, processes, and operations, Marketing to physicians in the area, Continuous Improvement
